French - Switzerland	fr	fr-ch	4108		1252
French - West Indies	fr		7180		
Frisian - Netherlands			1122	462	

This table was generated from information at Microsoft Windows Encodings and Code Pages and additional resources listed below.

Locale: A collection of language-related, user-preference information represented as a list of values.

Locale ID (LCID): A 32-bit value defined by Microsoft Windows that consists of a language ID, sort ID, and reserved bits that identify a particular language.

Codepage: "An ordered set of characters in which a numeric index (code point values) is associated with each character.
The first 128 characters of each codepage are functionally the same and include all characters needed to type English text.
The upper 128 characters of OEM and ANSI codepages contain characters used in a language or group of languages
(Taken from Related resources below)".
